

The best experience for end users and IT

Our main motivation is to keep user experiences ahead of the curve. It's a game changer when people working on the sales floor have the latest tools...it's the newest version of Windows 10 and Office 365 ProPlus that deliver those benefits."

Øyvind Hirsch, Head of Digital Platforms for [Bertel O. Steen](#)

Shift to a modern desktop with Microsoft 365

A modern desktop is the most secure, productive computing experience for business that's loved by end users and IT. With Windows 10 + Office 365 ProPlus, shift from complex upgrades to agile updates, chasing efficiencies to empowering your people, and from managing costs to creating more value.

Most Productive - Create the most productive environment for your workforce

42% would quit their job if office technologies do not meet their needs¹

Unlock user potential with powerful presentation tools; actionable insights generated through AI; and devices that support different workstyles via ink, touch, and voice. Support best-in-class teamwork with integrated collaboration capabilities. Mobility features that allow users to access their work from anywhere, coupled with intelligent assistance to help them stay on track, enable employees to create more value.

¹ US Future-Ready Workforce Study, 2106

Most Secure - Proactively protect users and the organization with cloud-powered intelligent security

40% reduced risk of a major security breach²

Out-of-the-box protection automates responses to cyber threats and helps guard against emerging ones. For added security, proactively detect issues as they arise to respond to malicious attacks quickly. Minimize data loss with built-in policies that plug accidental or intentional leaks. For multi-layer defense, embrace multi-factor authentication while also creating simplified, faster logins with cameras that recognize a user.

² Forrester, "The TEI™ Of The Modern Desktop With Microsoft 365" 2018

Lowest TCO - Transform IT and reduce costs with agile updates and simplified management

Save an average of **\$7.2 million** in total cost of ownership (TCO)³

Deliver the latest security and productivity innovations, and upgrade with confidence by using modern tools powered by the cloud. Get new devices up and running by automatically configuring settings, security policies, and install apps—also powered by the cloud—to save both time and money.

³ Forrester, "The TEI™ Of The Modern Desktop With Microsoft 365" 2018

Simplify the way IT enables users across PCs, mobile devices, cloud services, and on-premises apps.

Evaluate your IT readiness to deploy

Shift to a modern desktop with Microsoft 365

Assessment Goals

Understand Modern Desktop

You will be presented with the key benefits of deploying Modern Desktop in your company and the value it will add in your organization

Analyze your product lifecycle

Identify the lifecycle of the existing products and the impact of respective end of support

Assess Readiness

Assess your readiness to move to a Modern Desktop (Windows 10/ Office 365 Pro Plus) based on the portfolio of devices, OS and applications deployed in your organization

Assessment Outcomes

Identify device operating system

Versions of OS deployed – Windows 7, Windows 8 or Windows 10

Identify Office versions

Versions of Office are deployed – ProPlus or Perpetual

Device and application summary

Summary of device and applications in your ecosystem

Compatibility

Compatibility evaluation of your application & device portfolio

Issues and blockers

Key issues and blockers for deploying the Modern Desktop
