OPPORTUNITIES

NETRIX SERVICES

Be Flexible

“I want my employees to WFH and in the office without restrictions.”

“Should we bring folks back in waves, split schedules, or all at once?”

I want to work from anywhere.

I need a staggered return to the office.

- Workplace strategy
- Mobility program planning

- Envisioning
- Interviews and focus groups
- Employee engagement surveys
- Utilization intelligence
- Change management

Cost Considerations

“To measure social distancing, how do I leverage existing tech or deploy new tech in a way that is cost effective?”

I won't return to office if the space or technology is restricting.

- As a service offerings
- Cloud computing platforms
- New consumption models
- Outsourcing

- Mobility assessments
- Cost structuring scenarios
- Demand planning
- Budgeting

Be Prepared

“How can we evaluate and prepare for this new way of working?”

What will the new space look like?

Can I socially distance?

What meeting spaces can I use/not use?

- Workplace agility business continuity planning
- In-office technology assessment
- Leverage SaaS software to model out

- Workplace and occupancy strategy services
- Workplace tech assessments
- AD3
- Migration planning
- POC

Reopen Office

“I need to prove to my employees we put their safety first. How do we use tech to show them how?”

Show me the new office layout.

How do I learn to navigate the new space?

Can I use collaboration tech in any space?

- Digital Signage to deliver layout & messaging
- Mobile carts for technologies
- Open desk policy & booking

- Technology deployment
- Technology retrofit service
- Room schedulers
- Resource planning software

Measure and Track

“How do I measure, track and optimize our space for social distancing?”

“How can we make sure our meeting spaces are being used effectively?”

How will the company track our social distancing and workspace health status?

- NextGen workplace analytics
- Occupancy and utilization analysis

- Workplace utilization analytics
- Data validation and reconciliation
- Track and trace
- Data visualization and reporting
- Ongoing adoption measurements
