

# Microsoft Managed Security

Did you know that Microsoft 365 contains a comprehensive suite of enterprise-grade security tools? Do you know if you're using those tools to the fullest? With our Microsoft Managed Security Services, you can maximize the security features you already pay for and gain 24x7x365 monitoring and management of your entire environment.

Netrix's 24x7x365 virtual Security Operations Center (SOC) leverages Microsoft's enterprise-grade security software to monitor and respond to incidents and events as well as proactively hunt and investigate threats within your environment.

#### BRING YOUR EXISTING LICENSING

What many Microsoft users don't realize, is they may be paying for these security tools already. With our team acting as an extension of yours, we'll ensure you're making the most of your existing security investments. Accepted Microsoft licensing includes:

- Microsoft 365 E3+
- Microsoft 365 E5
- Microsoft 365 Business Premium

#### PURCHASE LICENSING

Don't have Microsoft licensing today? As a Microsoft Cloud Solutions Provider, we can provide the Microsoft licensing that best fits your business need.

#### SECURITY AUTOMATION

Our team continuously enhances your threat intelligence, analyzes attack behavior, and builds automated workflows that respond to real-time threats.

#### 24X7X365 SECURITY TEAM

Our Microsoft certified security engineers become a true extension of your team and give you the experience, expertise, and resource bench you need to mitigate your risk and compliance needs.

#### SECURITY STRATEGY

Our team serves as your security advisor, assisting you with evolving your architecture, technology strategy, and incident responses while providing continuous security posture improvement.

## Extended Detection & Response (XDR)

#### SECURE YOUR APPLICATIONS

Azure Sentinel is the command center of our security operations. It combines SIEM capabilities with critical Security Orchestration, Automation and Response (SOAR), delivered as a service to you via our Security Operations Center (SOC).

#### SECURE YOUR ENDPOINTS

Microsoft Defender ATP, in combination with Azure Sentinel SIEM/SOAR and our SOC analysts, deliver complete visibility, detection, automation, and response for your endpoints.

#### SECURE YOUR PERIMETER

We help you build and manage an optimal on-premises or Cloud/SASE based perimeter solution including next-gen firewalls, zero-day network-based protection and SD-WAN.
